

# ArcaneGaming

Fantasy sport & betting B2B provider

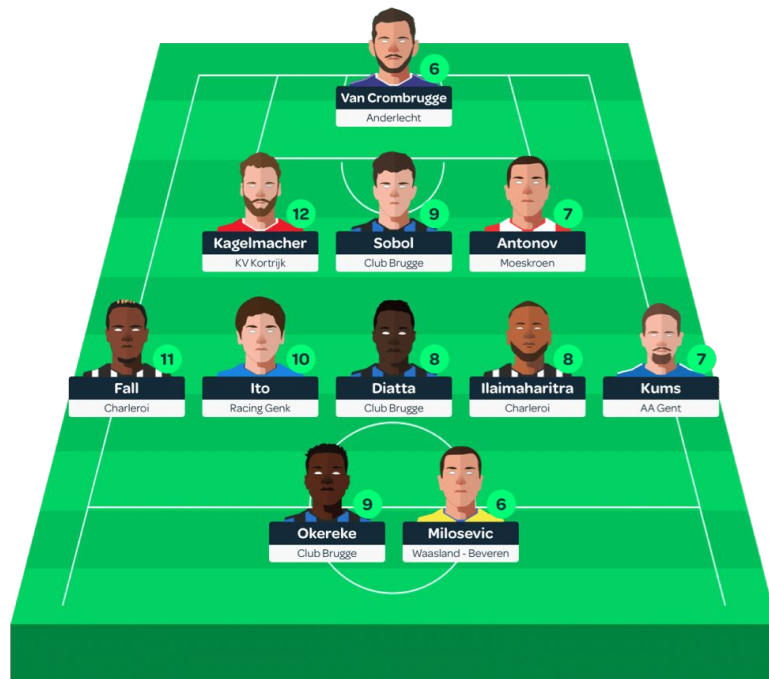

## What is Fantasy sports

Fantasy Sports are online prediction games where you put together a virtual team of real sports players

You earn points based on **real life statistics** that are converted into **fantasy points**. The better your player performs in real life, the higher your fantasy points.

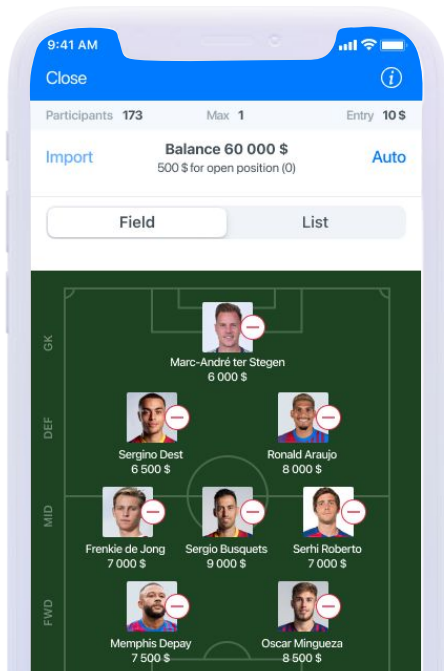

# Game formats

We provide a wide range of game formats

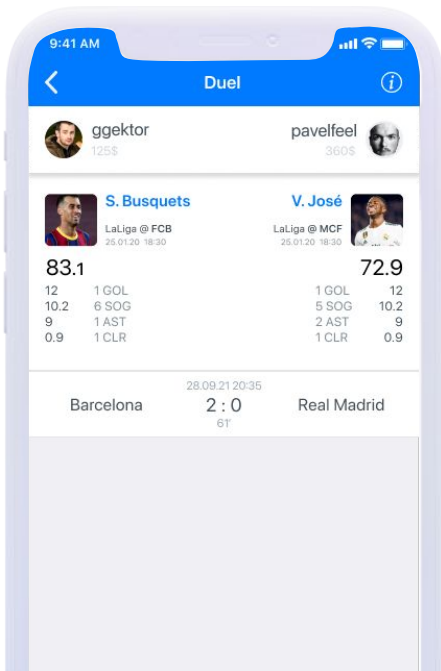

## Tournaments

Gather a team consisting of 8 players from different clubs playing in suggested matches. The main thing is to meet the budget

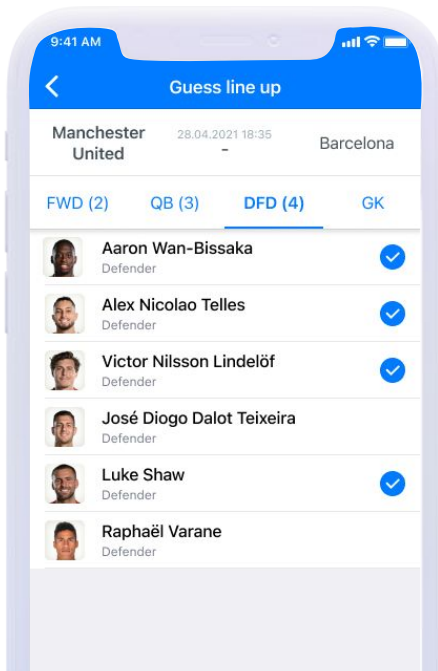

## Duels

Participate in existing duel or create your own one. Bet on one of two players and beat an opponent

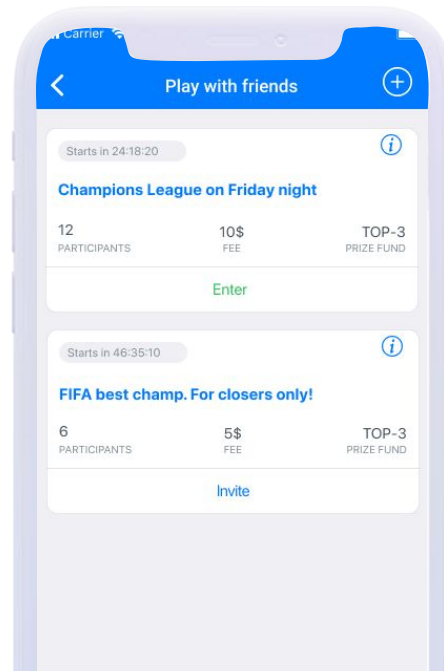

## Gather a team

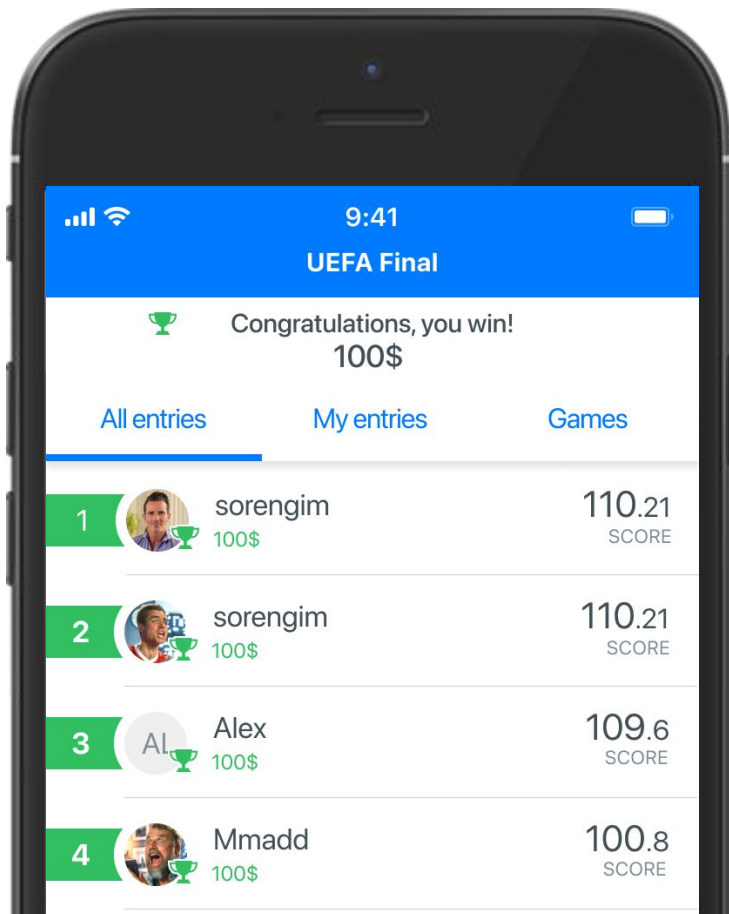

Guess 11 players of line up in an upcoming match

## Play with friends

Choose matches, pick a prize and play with friends

## How to earn

Monetization model is the commission as **percentage value** of the sum of players' bets called **rake**.

Let's consider the example of this tournament:

Fee

10 \$

Participants

1 000

Prize fund

10 000 \$

Rake - 10%

1 000 \$

## About benefits

### Google Play, Fb, Twitter

ArcaneGaming has access to users of social networks and other platforms which are usually unavailable to bookmakers

### One more way to spend user's money

Users rarely withdraw money playing fantasy sports. According to statistics, about 75% of them spend their prize money on other tournaments.

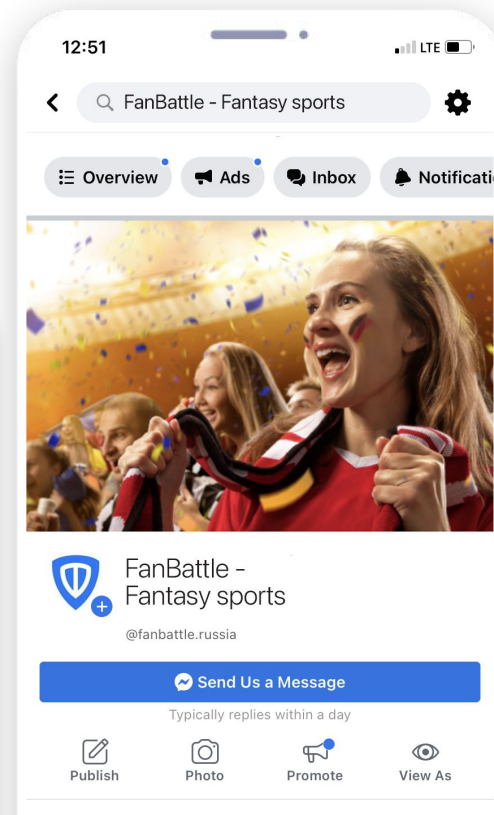

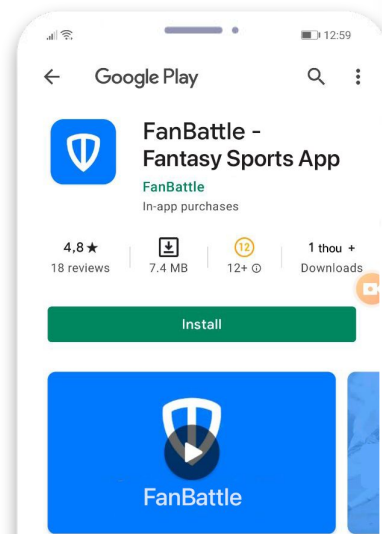

### More engagement

The longer users stay on your app the less time they have to open other apps

### Extra income

You get a percentage of each prize fund
